Taha Medical and Diagnostic Center Thakot:

BACKGROUND: TAHA Medical and Diagnostic Center Thakot (TMDC-Thakot) was registered with health care commission KP a year back on 14th December, 2021, under the umbrella of Social Services Program (www.sppakistan.org) with registration bearing number “17676(F). TMDC Thakot formally started to work on 25th June 2022 with a formal inauguration which was attended by all the relevant stakeholders. Current tehsil chairs of sub divisions, elected representatives, and village council’s chairmen’s; religious and social sector representation also participated.

Objective of Taha Medical and Diagnostic Center:

Through “the provision of exemplary physical, emotional and spiritual care” for our patients and their families, our physical efforts are aiming to directly contribute to the care of the most neglected and vulnerable ones in the region. Timely provision of highly specialized patient oriented health care services will ultimately reduce and change the health indicators.

TAHA Medical & Diagnostic Center believes in excellence and leadership, and is aiming at demonstrating this by providing exemplary health care services for each of our patient and their families. TMDC is ensuring a professional working environment where each family member is valued.

TMDC Existing Capacity:

Total capacity of the hospital is 20 beds, however currently 15 beds are available: 3 beds emergency/recovery ward, male ward 3 beds, 4 beds in female ward, and private rooms. Space for one bed ICU and three beds NICU is also there, yet to organize. Construction work of the laboratory has been finished a month ago and TMDC is now having a fully operational laboratory where all the routine investigation tests are carried out at a 30-35 % discount across the board. Due to the post floods crisis, TMDC announced a 50% discount on dengue and malaria tests.

Available facilities:

- 1- Consultants OPD.
- 2- Equipped Operation theatre and Labor Room.
- 3- Provision of 24/7 Emergency services, with the help of a “casualty medical officer” and a “lady doctor” supported by staff nurse, medical technician, pharmacist, laboratory technician etc.
- 4- Ultrasound for gynae OPD.
- 5- ECG plus vital Monitor for Recovery/Emergency Room.
- 6- Laboratory within the hospital where all the routine tests are carried out by well-qualified and experienced staff members at a 30 to 35 % discounted rate.

Why a Free Medical Camp?

If we look at the health, poverty and literacy indicators of the region, Kohistan, Shangla, Battagram and Kala Daka districts in Hazara Division are at the lowest in Khyber Pukhtunkhwa. Recent floods further multiplied the miseries of the local population. TMDC Thakot is involved from the day one in emergency response and opened its doors for the flood affected population of both lower and upper Kohistan, Shangla and Kaladaka as well. Besides free emergency services, TMDC staff is also providing them free nutritional counselling services at the hospital. To support the extremely poor families of the region, TMDC Thakot announced a free medical camp at the hospital on 25th September 2022, primarily for flood affected population, host communities and off course for the local catchment population too.

One week promotional campaign was carried out on social media and within the surrounding communities through volunteers on both side of the Indus River. These sincere efforts yielded positive results on the "Free Medical Camp" day where more than 200 families visited the hospital and enjoyed the available services. This is worth mentioning that, TMDC received patients from all the four districts who travelled at their own expense. They were examined at the hospital from 10 am in the morning till late evening the same day. TMDC Thakot offered a very attractive package to the local population; details are as follows:

- 1- Free Consultation (in routine OPD TMDC do charge a token entry fee of PKR Rs.300/- only).
- 2- Free ECG.
- 3- Free Ultrasound.
- 4- TMDC offered 50% discount on all investigation tests however in reality they paid only 40% instead of 50%.
- 5- Dengue and Malaria tests are always @ 50% discount due to epidemic.

During examination/consultation, mostly patients complained the following diseases: Diabetes, Hypertensive, TB, Asthma, Cold Cough, Fever, Hepatitis, Gastric, reproductive care issues.

Actual Outcomes of the Free Medical Camp:

- 1- Total patients examined = 200
- 2- Female patients =050
- 3- Male patients =120
- 4- Children (boys + girls) =030
- 5- Investigations tests carried out = 101
- 6- ECG =003
- 7- Ultrasound =025

Total Direct financial support to the patients examined was more than PKR 120,000/-

TMDC Team /Volunteer who contributed:
